

Homeownership is the American Dream but owning a home requires a lot of regular maintenance tasks to keep the investment in good shape. I am including a list of service companies and maintenance people who can help you, if you are not a DIY person.

“Who are you going to call to take care of things around your home?” I have put together quite an extensive list in a semi-alphabetical order and including:

air conditioning service, animal critter control/removal; awnings; dryer vent clean-outs; electricians; fireplace service; generators; handymen: including repairs, cleaning, and power washing; home clean outs including furniture removal and charity donation pick ups; home warranties, lanai screens/gutters; mobile car detailing; painters; plumbers; pool service; pool builders; roof cleaning and inspections; tree trimming and/or removal and window and drape cleaning and septic services.

Hope you find this helpful info and PLEASE let know if you have a service company and/or vendor to recommend. I have not evaluated lawn mowing services (so many!)

Air Conditioning Services

Air filters need to be clean/replaced yearly. Always schedule service on air conditioners yearly.

We have used **Bay Area** for years: <https://bayareacool.com/> **888-324-4033**

Air Pros of Ocala (352) 354-3515

BD Recommendation: *“Installed complete new ductwork, including a new feed to a previously unfed room, 18 inches of new attic and garage insulation and a new Carrier air conditioner, a two stage ultra-violet air scrubber, new air handler, new base and new wiring in one day, very next day of call. I won't scare you with what we spent, but the house is very comfortable, the air is incredibly clean, and we've added to the value.”*

HANDYMEN FOR YOUR HOUSEHOLD NEEDS: CLEANING, DRYER VENTS; PRESSURE CLEANING, ETC.

Many handymen can help with the **powerwashing** and cleaning of drives and lanai screens. I use Kevin Hurd but he and his partner Jeff can get busy, so I have developed a list of others, from other people's suggestions:

Kevin Hurd, Handyman (352-220-0352)

NEW: from BD resident: Davo's 352 -651-2530 Estradavidco@me.com; And another number, 352 – 436- 7805. His business card reads, gutter cleaning, baseboards, sheet rock, finish carpentry, painting, wood floors, pressure washing and Window Cleaning. So, it is good to know there is another reliable Handyman around.

NEW from BD resident: ACE hardware gave me a card for a Handyman. His name is Joe Baldocchi, lives in Beverly Hills, and his number is 352-322-6386. He is responsive, a good communicator, reliable, and knows what he is doing or recommends someone who does. He was on time, fixed my problems, and his charges were fair and reasonable.

PAINTER. We have had several homes in our 53 year marriage and we have painted both inside and outside several homes. We just moved back to Terra Vista and we utilized Mr. Max Painting 352-270-7574 for painting the full inside in April and just had his crew paint our full exterior this past week. **BEST PAINTERS EVER.** Attention to details were outstanding. Extremely pleasant to work with. Pricing was very competitive to others. No short cuts. Very very professionals and I'd highly recommend to my neighbors.

Rainy season starts in June and by March the roofs and driveways show the black algae :

ROOF CLEANERS:

Roof looking black? That is black algae. Black driveways need to be cleaned more often, but once a roof is cleaned, and if treated with a retardant, you can go about three years before having to have it cleaned again. And love our screened lanais but not when they turn green! Make sure they cover your bushes when they spray!

We have used **Ken Nedzke Citrus Roof Cleaning and Property Maintenance** for our roof cleaning jobs. He uses no pressure and a biodegradable solution that he adds additional cleaning agents to (i.e. Dawn and Simple Green to name 2). The chemical does not harm the landscape (but cover the plants anyway it does zap them a bit) . In our own experience, the zinc oxide treatment used as a retardant is worth the extra \$150-\$250 (depends on roof size). You can go a longer time for the next roof cleaning by applying it. Ken tries not to get on the roof, but some roof pitches require a minimal walk to get the entire roof and valleys cleaned. Ken does not believe in power washing roofs since the pressure can loosen and or remove the caulking. Using bleach is not good for the caulking either. (325-270-3927, <http://citrusroofcleaning.com/>)

Back2Bright. Check out their website, very informative on why to clean your roof! *Many people do not realize how infested their roof really is because the spores gradually take it over and a lot of times the color changes uniformly. A good way to check is by looking at your sewer flues and vents. Most of them are galvanized, which means they were created using electrolysis which coats them with thin layer of zinc. The zinc oxide acts as a mold and mildew inhibitor. Therefore, when you look at the vents and flues on your home, you'll find the original color of your roof!...* <https://www.back2bright.com/> **352-445-4840**

ROOF INSPECTIONS MAINTENANCE:

Tile roofs are supposed to last for 35-50 years...but you do have to have them periodically inspected and have cracked, loose tiles replaced. Caulking is needed on all roofs...yes, even the metal roofs Vents on the roof can also be compromised as well... squirrels love to chew on areas up there. It seems lately, home inspectors are more and more checking that the roof valleys are not full of leaves which can cause water back up and eventually roof leaks.
